

DOLORES ASHCROFT-NOVICKI SHARES HER WISDOM

Zuerich 23.- 25. April 2010

WORKING WITH THE ELEMENTAL WORLD

©2009 Worldwide copyright to Dolores Ashcroft-Nowicki

One of the basic forms of knowledge needed when you begin a study of the Inner Mysteries is that of the World of the Elements. You, as a human Being are composed of these four elements. Your physical body is composed mainly of water, (we are basically sea creatures for we evolved from the ocean) it holds minute quantities of every earth mineral for what we eat contains those minerals and they build our bones, flesh, and physical form. We breathe air, without it we dies, and within us we carry a central core of body heat that keeps us at the temperature we require for our health. So, Earth, Water, Fire, and Air are all present within us from the moment of birth. On our death those components are no longer held together and decay into their natural form. We use our mastery of these elements in all magical work, but we have to earn that mastery. The elements within our body are under our control, those outside us must be contacted and befriended in order to win their support Some people have the ability to draw these elements to them and earn their respect. Most of these people are what we call The Craft, or witches. Their kind of magical work is 90% to do with the elements.

However those who work in ceremonial magic also need to make enough contact with the elements and elementals to be able to use them in ritual and ceremony.

This workshop is designed to explain their presence in our lives, their powers and dangers and the correct way to use them in ritual conditions.

There will be pathworkings and individual rituals for each elements and an Inclusive ritual using all the elements on the Saturday night. Please bring a suitable robe or caftan with you and some soft slippers. Everything else will be provided.
